

## Vent and exhaust valve

### Application:

The vent and exhaust valve is often used for storage tanks.

The valve works in the same way as a check valve.

### Construction:

- The top and bottom sections are bolted with a standard nut
- The lower section has a welded connection
- The small exhaust pipe on the upper section can be rotated to any given position

### Quality:

- Product pressure: 10 bar
- Stainless steel AISI 316

### Operating conditions:

Max allowed operating temperature: <90°C.
