

Silicone hose, Platinum, Cleanroom

Application:

Silicone hose suitable for peristaltic pumping and fluid transfer in pharmaceutical and biotech applications with high hygiene requirements.

NOTE! We offer more dimensions than those listed in the table below. Please contact us for a quote.

Construction:

Made of transparent silicone and smooth inside. Packaged in cleanroom at ISO-7 certified facility and delivered in a double bag. The silicone hose can withstand high temperatures and is highly flexible.

Hardness: Shore 60.

Temperature:

The temperature ranges from -40°C to +200°C. The hose can be autoclaved.

Pressure:

All pressures are stated at the temperature +20°C.

Standards:

FDA (Title 21 CFR 177.2600), NSF-51 certified Silicone Resin, EP 3.1.9 (European Pharmacopeia), USP Class
